

LEGAL SYSTEMS IN KOREA

Prof Moosang Kim

I like the way the class was conducted and the Professor sits **in** front of all the students which makes the both parties to come more closer.

The Professor starts the class with the simple questions and also he asks the student's opinions and also outside observations.

Through the lectures I learnt quite a number of new words and Korean culture and overview of Korean Legal System. The Professor started with Max Weber's definition of rights which is very important before we start with the legal system.

The concept of rights of Max Weber has given me some kind of idea which help idea to understand the micro view of the legal system. The professor started with the simple concept and later he went deeper in the legal system which given us outline of Korean legal system. From him I observe that the professor has a very good method and technique of reaching. Although we don't have much time we have learnt a lot and I really appreciate him.
