

Professor: Moosang kim

Student: Liu Xinwei

I really enjoyed the legal system class in Korea. For it gave students a chance to grasp the theory of the legal system in Korea. Because of this, I feel it was a very good and well thought through course.

In this semester, students were taught about: 1.Course overview 2.History of legal system 3.Values of Korean society 4.Human rights, by Max webber's 5.Negotiation method and effectiveness.

I felt your teaching method was a good way to explain the topic with discussion and role play. I enjoyed discussion format more than lecture format.

During studying , I have understood a lot of legal theory. For example, I comprehend the Max webber's definition about Right. I realized the significance of relationships between the people in a society. Furthermore, I now know the Western and Korean different thoughts towards rights, and so on.

Thanks for your time in teaching our class thoroughly!
