

1. Good point

- (1) I could widen my intellectual horizon. (Law, sociology, politics, economy, psychology...)
- (2) I learn to enjoy difference so that I get the confidence. Because before this stage, when I feel difference with others, I usually thought that I'm wrong and I have to fit with them. But now I enjoy the differences between people, and I just say my thought is somewhat different from you.
- (3) Group workings were a good experience for me to research books and cooperate; though sometimes it was not so good.
- (4) 'Negotiation skill' and 'power' was a really good and practical.
Thank you so much.

2. Miss point

- (1) Time using (we spent much time waiting)
- (2) I don't think 'Korean Law in the Global Economy' is a good text for us.
